

Drive a *new* car without dipping in to your savings.

If you've saved and saved for your next set of wheels, you're not alone.

A lot of people plan to buy outright, but novated leasing is the lesser known alternative that lets you save your savings, while still driving new.

When you take out a lease with Maxxia, we not only find the new car for you, but we manage the paperwork, arrange the finance and insurance if needed, negotiate with dealers and can even arrange to have the car delivered to your home or work.

How does it all work?

You drive away today, and then pay over the course of a few years, using a combination of your pre-and post-tax salary.

A typical lease period is normally four to five years then you have the option to lease a new car, re-lease your existing car or purchase the car outright at the end, making up the difference.

Because you're using some pre-tax funds, you could lower your total taxable income and save overall.

Take advantage of our buying power

As one of Australia's biggest car buyers, Maxxia has access to fleet discounts on a wide range of new makes and models. So let us help you narrow down your choice, or get a great deal on the one you have in mind.

We can work with you to find the right fit so you can focus on the fun part... the joy of driving a new car!

Ready to get a new lease on life?
